

# RECORD HAY PRICES IN 2008!

Recent USDA reports indicate a reduced hay supply for 2008. Combined with other economic factors, the trend of higher hay prices will continue. This is not good news to horse owners and stable managers already struggling to find quality feed sources at affordable prices.

There is an alternative. Since 1991, Chaffhaye has been producing premium quality forages that are independently tested for consistent, nutritional content. Finally, quality meets affordability and everyone wins: horses, their owners, and equine business managers.

Chaffhaye is an all natural solution to many equine problems that can be addressed with better nutrition. For sugar/starch problems (insulin resistance, laminitis, colic or obesity), Chaffhaye is a great solution. With an NSC score of 5.3-7.3% , Chaffhaye is an ultra low sugar/starch feed. It's "pre-digested" form makes it easy to chew for seniors and enhances nutritional absorption so there's less manure (up to 50% less) and less intestinal fill reducing hay belly in horses of all ages. Chaffhayes' probiotics keep bacterial gut flora healthy for improved immune response and addressing stress related activities such as traveling and competition.

Chaffhaye is fresh nutrition—guaranteed. Sealed within hours of harvest, Chaffhaye locks in the natural moisture and texture of fresh pasture enhancing it's palatability. A recent study in Sweden showed that horses eat the largest amount over the longest periods of time when fed forage similar to Chaffhaye.

There are other benefits to Chaffhaye besides high quality nutrition. The 50# bags are easy to handle plus the weather-proof packaging allows outdoor storage and a guaranteed shelf life of 18 months with no nutrition loss. Chaffhaye has been tested by California's Department of Food and Agriculture and is certified to be weed free and suitable for use in environmentally sensitive areas.

Currently available in Alfalfa, Chaffhaye grass will be available in July.

Chaffhaye is recommended by animal nutritionists, veterinarians and Organic Equine Magazine because the product provides superior nutrition.

OPTIMAL HEALTH THROUGH ENHANCED NUTRITION  
**Premium Pasture-in-a-Bag**

**PREMIUM QUALITY FORAGE SINCE 1991:** Everyone wants to feed their horse the best but with the economy; budget often wins out over quality. Chaffhaye eliminates the need to compromise—you get premium quality and affordability.

**The Chaffhaye Process:** Chaffhaye is made by carefully selecting and harvesting forages at peak leafiness to maximize nutrients, palatability and digestibility. Within hours of harvest, Chaffhaye is chopped, lightly misted with molasses and compressed into air-tight bags sealing in that pasture freshness. In the bag, the hay undergoes a natural fermentation, similar to the digestive process in the hindgut of a horse. The process converts the forage into a "pre-digested" feed with live yeast and beneficial bacteria not normally found in dry hay, pellets or cubes. Chaffhaye is not a sweet feed, the molasses acts as a food source for the beneficial bacteria that do the work of fermentation. Chaffhaye facilitates greater digestion in the foregut of the horse where the bulk of proteins, fats, starches, vitamins and minerals are absorbed.

## SAVE THOUSANDS ON FEED BILLS!

Attention Stable/ Barn/Farm Owners.  
Take the Chaffhaye Challenge and discover how much you can save in feed costs and manure disposal while feeding premium quality.

**800.573.1461**

"I have changed my whole barn over to Chaffhaye and believe it will be the feed of the future. Since doing so, my horses have experienced greater health and performance. I truly believe my recent successes in both the hunter and jumper arenas are directly related to my use of Chaffhaye."

**Morley Abey**  
Joie Gatlin-Morley Abey Show Jumping Inc.

"Chaffhaye is a superior product that is totally consistent. You see and feel results in as little as 30 days. My horses love it!"
